Hot Chocolate On a Spoon

Posted On Jun 01, Posted by Dave Category General

Love Hot Chocolate? Love Chocomize? Wish the two were together? Well now they are! We're pleased to announce the arrival of our newest product…Hot Chocolate On a Spoon!

Here at the Chocomize Headquarters, we've been working hard to bring you the latest and greatest in chocolate innovation. After many long nights up tasting chocolate (so much chocolate) and experimenting with flavors, we're proud to bring you our newest addition that we know you'll love. All you have to do is put your Hot Chocolate On a Spoon in a mug filled with milk, heat the milk and chocolate till hot, stir until the chocolate has completely dissolved, and finally the best part…enjoy the delicious hot chocolate!

Initially, we have 3 flavors to enhance your hot chocolate experience, but you can expect that number to greatly increase as we continue to perform tests here at the factory.

- Milk Chocolate with Creamy Hazelnut

- Dark Chocolate with Nutty Amaretto

- White Chocolate with Vanilla

Look for them on our Favorites Page !

Let us know what you think about our Hot Chocolate On a Spoon. What flavors would you like in your Hot Chocolate?
