

Custom images for your chocolate bar

Posted On Jan 22, Posted by [Hirerussians](#) Category [Custom Images](#)

Chocomize is excited to introduce a new way to customize your chocolate bar!

For those of you who don't already know, the idea of Chocomize is that you can custom design your own custom chocolate bar. Originally, that meant you could choose from three different types of chocolates, white, milk, or dark, and around 75 different ingredients. As we have grown and progressed, however, we've increased our ability for you to customize your chocolate bar.

T

he most obvious way we've improved the ability to customize your chocolate bar is by adding

ingredients that YOU have requested. We started with around 75 different ingredients, right now we have close to a hundred! We could not have done that without input from people who just wanted to have what they thought was the perfect ingredient for their chocolate bar. We are ashamed that we never put some ingredients on our website from the beginning (graham crackers and caramel come to mind), others weren't so obvious (think bacon, sea salt, cayenne pepper), but have proved to be extremely popular. We want, and we are glad to have, ingredients that people think are high quality and delicious, so keep on suggesting!

Pretty soon after we launched, we started letting people customize the packaging for their chocolate bar. This option was really popular for bigger orders such as weddings, corporate gifts, or any other kind of special occasion. Customers can send us what they want on their packaging, such as pictures, messages, etc., and we create a label to cover the packaging. This really makes Chocomize a great option for any occasion.

We are proud to offer our newest way for people to customize their chocolate bar: **being able to print images and messages on the chocolate itself!**

This might be the coolest way to create that perfect custom chocolate bar. Whether it is a picture, slogan, company logo, or really anything you can think of, we'll put it on the chocolate bar. And don't worry, it's completely edible (we would never put anything in chocolate that wasn't.) Check out this sweet image (yeah pun intended) of a chocolate bar we made.

So if you want to know how to add an image to your chocolate bar, or design labels for your packaging, or if you have a great new ingredient, make sure that you let us know at info@chocomize.com

. Remember, the possibilities are literally endless!
