Ingredient of the Week: Raspberries

Posted On Mar 13, Posted by Hirerussians Category Ingredient of the week

The results are in; raspberries far and away won the contest for ingredients that should be added to our website. So of course they are featured as our 'ingredient of the week!' It's a good thing that we listen to you guys, because the raspberries taste absolutely DELICIOUS in chocolate (I recommend dark chocolate.)

We had over forty people vote for their favorite ingredients. The top three were raspberries, lavender, and chocolate nibs. We didn't add these ingredients right away because we needed time to find the highest quality ingredients possible. We put only premium ingredients on our website and wanted to make sure that we had found the best of the best.

As far as the raspberries are concerned, I would say: mission accomplished. They don't just taste great, they are healthy as well! Raspberries are known to have some of the highest levels of antioxidants of any fruit. As we always say, we aren't doctors here at Chocomize, but we can say for sure that you're going to love the taste of these raspberries in your custom chocolate bar.

Stay tuned for when we add lavender and chocolate nibs to our website! As always, give us more suggestions for ingredients. We will be starting another contest soon with ten of the best ingredients that have been recommended to us recently.
