We at Chocomize are all about customization. We already have a ton of ways you can customize your chocolate bar (see our previous blog posts for a detailed lists of all the ways you can customize at Chocomize.) **We are proud to offer a new way: Name your own chocolate bar!**

If you have ordered from us in the past day or two, you will have noticed a change. We have a brand new checkout! Throw out your username and password, you don't need them anymore. We've made things a lot simpler and easier to manage so that you have an easier time ordering your chocolate. The only thing that didn't change was our great security system. **We are a completely secure website, always have been and always will be.**

This means that you never have to worry about your information being compromised, you are always safe at Chocomize.

In addition to making things simpler in our checkout, **we've added the 'Name Your Bar' feature**. On the first page of the checkout, you have an option to write a name that will appear on the back of the packaging of your chocolate bar. If you look at the picture I took of the checkout, you will notice that I named my bar 'Nick's Awesome Bar'. So far we've been getting a lot of great responses to this feature and people have come up with a lot of creative names. Have any good ones?  
**Also we should mention that it is FREE!**

Let us know if you can think of some good names and we'll come out with a blog post soon of some of the best ones. Thanks for being fans!

Nick
